

Hello NASA Drivers!

Your individual image galleries from **Sebring June 19-20** are now available online at:
<http://www.hendricksportsphoto.com/Auto-Racing/NASA-Sebring-June-19th-and>

As I indicated during the drivers meetings on both days, **your entire gallery of images can be purchased on disk for \$40.00**. The images are unedited, other than conversion from Canon raw files to jpeg files via Photoshop CS3. Essentially they are straight out of my cameras.

In order to keep the cost down, I'm not performing any post shoot editing on the images. Some images may appear very similar as they were shot in one location during multiple laps for each group session. Again this approach was just a way to keep the costs down for NASA drivers. To give you an idea, my normal daily rate for race event shooting with full editing is \$200 to \$500 per client, per day, depending on the race series & relationships with the track, team clients, sponsor clients, driver clients, etc.

The images are personal rights released and can be edited with virtually any image editing software should you wish to crop, color change etc. You're welcome to use them in any fashion other than retail sales to internet or print publications, which can still be done, it just requires an approval release from my office.

Gallery Viewing Tips:

The galleries will open in a default mode with small images on the left and a larger image on the right. Clicking on any smaller image will highlight it in larger right pane. However, for best viewing, I suggest using full screen. To view full screen simply click once on the larger image in right and pane in default mode. You can then increase the full screen image size by clicking the X1, X2, etc buttons at the top of the page in full screen mode. Use your keyboard arrow keys or arrows at the top of the image to move forward and backward through the gallery in full screen mode. To return to default viewing mode, just click once on any full screen image.

Delivery & Payment:

I huge fan of NASA and basically work on the honor system. Once you've reviewed the images and decide you would like the disk, just email me your approval with a mailing address & I'll mail the image disk to you, with an invoice and a postage paid envelope for return of the check.

That's it! **Just please be sure to make the check out as indicated on the invoice, to: John R. Hendrick**, rather than the business name.

I'd like to express my personal thanks to the following participants who have already purchased full image galleries from the Sebring Event: *Dave Stine, Pettit Racing, Jim Ferrare, Jay Goldfarb, Mark McKay, Jeff McElyea, Dennis Merritt, Ami Vizer, Brian Jacobs, John Parson, Alejandro Illera, Mark D'Elia and Matthew Westbrook.*

Thank you in advance for your potential new business and please feel free to call me with any questions regarding your potential order. (941) 914-8005. I'm also happy to assist with questions regarding image editing.

I look forward to seeing you at the next NASA DE/Racing Event!

Best Regards,

John R. Hendrick
